- Completed | Cheran Matric Higher Secondary School, Karur | 76%

Project Work

Revolutionizing Food Sharing for Sustainable Tomorrow

- Used Programming Languages: Java, Java script, PHP, CSS, HTML
- In a world where food insecurity persists as a pressing issue, food management forecast emerges as a digital catalyst for positive change. Rooted in the principles of inclusivity and accessibility, this initiative leverages HTML to create a user-friendly web platform designed to efficiently manage and distribute food resources to individuals facing economic hardships.

Library Management

- Used Programming Languages: C
- Developed a Library Management System in C language, featuring functionalities like book tracking, searching, and updating records. It uses file handling for persistent data storage and provides an intuitive menu-driven interface. The project demonstrates proficiency in C and logical problem-solving.
